

STICKER-REC11

- Safe Area
- Artwork Bleed
- Cut Line
- Fold/Crease Line

Application Instructions

1. Make sure to thoroughly clean the area that you plan on placing your sticker.
2. Before applying sticker make sure the area is completely dry. Remove the backing for the sticker, then start by putting one side down. Press the sticker onto the surface and then slowly peel the rest of the sticker off. If you find it is on crooked, this will help demonstrate how to apply it. It should be laid to settle, remove the sticker and if you find it on crooked, the sticker can be removed entirely and reapplied; however, it will become less adhesive the more you repeat this process.
